Eligible for signing internship agreements through IE University, EU Work permit

SUMMARY

Business Administration and Data & Analytics student at IE University who builds AI-powered products end-to-end, from an AI operations platform for a dental clinic to a real-time digital twin for emergency drone operations. Combines business judgment with hands-on engineering in Python, SQL, TypeScript, and React to turn complex operational problems into practical solutions.

EDUCATION

IE UNIVERSITY (IEU) — **Madrid, Spain**
Dual Degree in Business Administration and Data & Analytics — **Expected: May 2027**
Operating Systems & Parallel Computing | AI-Machine Learning & Analytics | Time Series Analysis & Forecasting

UNIVERSITY OF MICHIGAN — **Michigan, USA**
School of Information (Study Abroad) — **Fall 2025**
SI 338: Advanced Web Design and Accessibility | SI 247: Human-Computer Interaction

RELEVANT EXPERIENCE & PROJECTS

CARELOOP - AI OPERATIONS PLATFORM FOR A DENTAL CLINIC — **Buenos Aires, Argentina**
Clínica Aragonés — **May - October 2026**
- Built CareLoop, an AI coordination layer working alongside the clinic's records system to track multi-step treatments and specialist referrals (Next.js, TypeScript, React, Supabase/PostgreSQL, Vercel).
- Developed an AI assistant (Claude API, Whisper) that turns doctor dictation into structured records, quotes, and treatment plans, and automated patient reminders and no-show follow-ups via WhatsApp Cloud API. Backed by 900+ automated tests (Vitest, Playwright).

DIGITAL TWIN PLATFORM FOR EMERGENCY DRONE OPERATIONS — **Madrid, Spain**
The HPE CDS Tech Challenge — **February - March 2026**
- Built a digital twin platform (Next.js, TypeScript, React, Leaflet) with real-time telemetry and simulation to improve drone operations and decision-making.

SATELLITE IMAGE CLASSIFICATION — **Madrid, Spain**
CNN vs ResNet vs EfficientNet — **January 2026**
- Developed and evaluated deep learning models (CNN, ResNet, EfficientNet) using PyTorch for satellite image classification
- Improved classification accuracy by comparing architectures and tuning hyperparameters.
- Analyzed trade-offs between model performance and computational cost.

TRASEMISA — **Madrid, Spain**
IEU Strategy Lab — **January - June 2024**
- Analyzed operational datasets using Python (Pandas) and Excel to identify inefficiencies, improving decision-making.
- Cleaned and structured datasets using SQL/Python to enable downstream analysis and reporting

FURTHER EXPERIENCE

- IT Skills: Python, R (RStudio), SQL, MongoDB; PyTorch, CUDA, NumPy, Pandas, scikit-learn; Tableau; HTML, CSS, JavaScript; Git/GitHub, Docker, Linux; Jupyter, VS Code; UI/UX design & prototyping (Figma); Microsoft Office & Google Workspace.
- Advanced Trading Course: NW TRADING, Buenos Aires, Argentina (Aug–Sep 2023)
- Visualization Competition: IE UNIVERSITY, Madrid, Spain (Apr 2023)
- **Semi-finalist at HPE CDS Tech Challenge**: Advanced to the semi-finals of a 325+ student, multi-phase national competition organized by Hewlett Packard Enterprise. (Madrid, Spain. 2024)

LANGUAGES

Spanish (Native), **English** (Fluent), **French** (Advanced)

ADDITIONAL INFORMATION

- International Experience: Valencia (Spain, Nov – Dec 2019), Geneva (Switzerland, Aug – Sep 2018), Michigan (USA, Aug – Dec 2025).
- Academic and Professional Achievements: Won the third prize in a datathon organized by Ryanair (Madrid, February 2024). Recognition in a statistics competition for an essay on predictive analytics (Madrid, May 2024). Named among the top ten promising young marketing talents in Spain in a marketing competition (Madrid, May 2024).
