Eligible for signing internship agreements through IE University, EU Work permit

SUMMARY

Business Administration and Data & Analytics student at IE University (graduating May 2027) who brings a strategic, business-value lens to building AI agents, and writes the code. Founder-builder of CareLoop, a production AI agent platform running at a dental clinic: led discovery with doctors and secretaries, prioritized the workflows with the most impact, prototyped fast with Claude Code and kept iterating in production. Combines business and strategy training with hands-on LLM engineering (Python, TypeScript, Claude API, Whisper, RAG).

EDUCATION

IE UNIVERSITY (IEU) — **Madrid, Spain**
Dual Degree in Business Administration and Data & Analytics — **Expected: May 2027**
Big Data Technology | Advanced Databases | AI-Machine Learning & Analytics | Operating Systems & Parallel Computing

UNIVERSITY OF MICHIGAN — **Michigan, USA**
School of Information (Study Abroad) — **Fall 2025**
SI 338: Advanced Web Design and Accessibility | SI 247: Human-Computer Interaction | SI 425: Introduction to User Modeling

RELEVANT EXPERIENCE & PROJECTS

CARELOOP - FOUNDER & BUILDER, AI AGENT PLATFORM FOR A DENTAL CLINIC — **Buenos Aires, Argentina**
Clínica Aragonés — **May 2026 - Present**
- Scoped and launched CareLoop as a solo founder-builder: mapped the clinic's real journeys (treatment plans, quotes, lab orders, insurance billing and e-invoicing) with doctors and secretaries, took it to production across 3 role-based apps and shipped 2,300+ commits in 6 months (Next.js, TypeScript, Supabase/PostgreSQL, Vercel).
- Designed Lumi, a voice AI agent (Claude API, Whisper) that routes a doctor's dictation into 10 workflows, retrieves patient context (RAG) and drafts clinical records, quotes and treatment plans in one pass; escalates to staff when data is missing and runs patient reminders and follow-ups over the WhatsApp Cloud API.
- Owned the quality bar: golden-conversation evals and 6,000+ automated tests (Vitest, Playwright), with deterministic guardrails that keep prices and insurance copays out of the LLM. Testing against the live model showed the agent over-asked clarifying questions on 2 of 5 coded dictations; added targeted guards to fix it.

TRASEMISA — **Madrid, Spain**
IEU Strategy Lab — **January - June 2024**
- Analyzed a real company's operational data (Python/Pandas, SQL, Excel) to identify inefficiencies and support data-driven decisions.

DIGITAL TWIN PLATFORM FOR EMERGENCY DRONE OPERATIONS — **Madrid, Spain**
The HPE CDS Tech Challenge — **February - March 2026**
- Built a digital twin platform (Next.js, TypeScript, React, Leaflet) with real-time telemetry and simulation to improve drone operations and decision-making.

SATELLITE IMAGE CLASSIFICATION — **Madrid, Spain**
CNN vs ResNet vs EfficientNet — **January 2026**
- Built and evaluated CNN, ResNet and EfficientNet models in PyTorch; tuned hyperparameters and weighed accuracy against computational cost.

FURTHER EXPERIENCE

- **Technical Skills:** LLM agents (Claude API, Claude Code, prompt engineering, RAG, evals, tool use), voice AI (Whisper), APIs and integrations (WhatsApp Cloud API, AFIP e-invoicing); Python, TypeScript/JavaScript, SQL, R; PyTorch, scikit-learn; Next.js, React, Supabase/PostgreSQL, MongoDB; Docker, Git/GitHub, Vercel; Vitest, Playwright; Tableau; Figma.
- **Semi-finalist, HPE CDS Tech Challenge:** 325+ student national competition organized by Hewlett Packard Enterprise (Madrid, 2024).

LANGUAGES

Spanish (Native), **English** (Fluent), **French** (Advanced; French Baccalaureate, Lycée Franco-Argentin Jean Mermoz)

ADDITIONAL INFORMATION

- **Academic and Professional Achievements:** 3rd prize, Ryanair Datathon (Madrid, Feb 2024); recognition in a statistics competition for an essay on predictive analytics (May 2024); named among the top ten promising young marketing talents in Spain (May 2024).
- **Leadership:** 10 years of rugby in a team leadership role; led 10 volunteers in a Río de la Plata shore clean-up (Buenos Aires, 2021).
- **International Experience:** Michigan (USA, 2025), Valencia (Spain, 2019), Geneva (Switzerland, 2018).
